

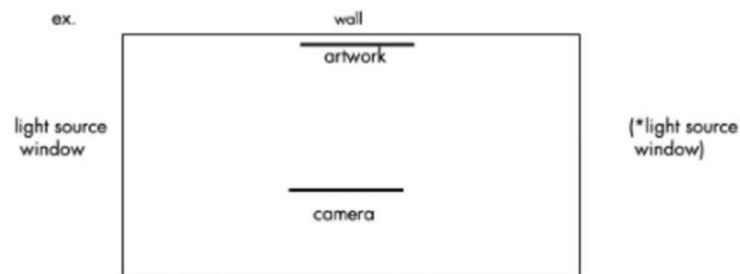

# Photographing 2D Artwork

## Tips for photographing artwork :

- Setup in a space where there is even window lighting (high noon, sunny day)  
\*note one window source on either side of wall/artwork setup will suffice
- Hang/Clip artwork flat on the wall (unframed/no glass to prevent reflection)
- Photograph artwork at eye-level and hold camera/smartphone vertically, straight as possible to prevent distortion (tripod optional)

## Tips for Editing artwork

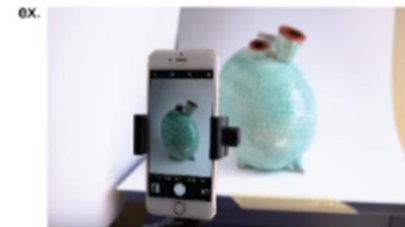

(Photoshop , Snapseed app for smartphone, etc.  
On iphone click photo > edit > light and color : drop down tabs )

- Color balance and edit accordingly to match original artwork
- Crop and level artwork

# Photographing 3D Artwork

## Tips for photographing artwork :

- You will need a flat surface to place 3d artwork on ( Table , Desk , etc. )  
2 pcs. of white poster board / heavyweight paper and tape
- Situate table against the wall adjacent to window  
(natural light / light source , high noon sunny day)
- Place poster-board on the table top surface and against the wall to create seamless curve > tape down

## Sizing and Formatting Requirements :

(Photoshop tabs > Image > Image Size)  
(From iphone : click photo > email photo > File size option (reduce file size accordingly)  
(free online programs, resizeimage.net, birme.net, etc.)

File type: JPEG or JPG files only.  
Max file size: 3MB  
Resolution: 72 pixels/inch or 1200 pixels or greater on the longest side
